

Financial Markets and Market Risk Management

The financial markets are constantly changing. In recent years, the financial markets have changed significantly due to the global financial crisis. The regulatory authorities and financial institutions require more transparent, fair, and prudent actions from all market participants. On the other hand, banks and corporations are taking on an increasing level of market risks as a way to improve performance.

- Portfolio effects from diversification and volatility
- Market risk management
- Risk limits and control process
- Introduction to Value at Risk (VaR)

Course Director: Jernej Doles

Date: 24-25 January 2019

Venue: Budapest, Danubius Grand Hotel Margitsziget

Course Objectives

The objective of the workshop is to present the current functions of the major financial markets and instruments in a structured and comprehensive way. The participants will receive a good and practical understanding of markets and instruments. We will start with an overview of recent developments in the financial markets, including the new regulation. We will discuss reasons for the movements of foreign exchange and interest rates. Then we will take a closer look of capital markets. Main equity and debt instruments will be presented. In the end, we will make a short, but thorough introduction to the derivatives markets and instruments. After discussing specific market risks, the instruments and methods used to manage individual risks will be discussed in more detail and supported with case studies from practice. At the end of the seminar, we will introduce the concept of Value at Risk (VaR), as an important measure of market risk, and demonstrate how it is calculated and used.

Biography

Jernej Doles is the founder and managing director of Omega Finance. He was formerly general manager and chief dealer in the financial

markets department at NLB d.d. He was responsible for all of the bank's trading activities, including on the FX, money market, fixed income, derivatives, and customer desks.

17.00	End of the first day of the Workshop

He began his career at NLB at the beginning of 1990s as a trader in the financial markets.

He traded on the FX, money market, and corporate desks, and he was involved in portfolio management. In October 1997, he became head of the derivatives department, responsible for managing the derivatives desk. This provided him with a unique insight into the trading, marketing, and valuation of different derivative instruments. He was responsible for introducing new derivative instruments at the bank.

Day 2 Friday, 25 January 2019

9.00–10.30	Introduction to market risks Types of market risk Portfolio effects from diversification

15.00	End of the second day of the Workshop

Through trading different financial instruments, he also gained a great deal of practical experiences with financial risks. Mr. Doles has many years of experience teaching and consulting on financial topics, such as derivatives, hedging portfolios, fixed income, equities, and risk management. He has held courses at different educational institutions in Europe.

Teaching Methods

The workshop consists of the theory of financial instruments and financial markets, debates, short examples, and exercises. Prior knowledge in this field of finance is not required.

The workshop is also suitable for all, who trade on a daily basis with different financial products and would like to complement their theoretical knowledge or upgrade with practical examples from real life.

Participants are asked to bring a financial calculator (HP 17BII or similar) for calculating practical examples and exercises. Only a minimal amount of calculus knowledge is required in order to master numerical analyses and examples during the workshop.

After the workshop, participants will better understand financial instruments and the logic of the functioning of financial markets, as well as the link between the instruments and the risks.

Who should attend?

- traders
- treasurers at financial institutions and companies
- treasury sales,
- asset-liability management professionals
- sales professionals covering corporate and institutional investor clients with markets and risk management strategies and products
- risk managers
- accountants and auditors
- regulatory reporting staff

Summary of the Workshop

Financial markets play a key role in market economies. The interaction between buyers and sellers allow them to determine prices of financial instruments, offer liquidity, and reduce transaction costs. They tend to increase the speed of transactions and find new instruments that will meet the needs of the most demanding market participants.

In recent years, the financial markets have changed significantly due to the global financial crisis. Many market participants have disappeared. The scope and way of trading with financial instruments have changed.

Regulatory authorities require more transparent, fair, and prudent actions from all market participants.

New regulatory requirements attempt to restore confidence in the stability of financial institutions and markets.

This course provides participants an understanding of the frameworks that can be used by financial institutions, institutional investors and corporations to identify, measure, and report market risks. It provides a detailed overview of the state of market risk management, including measurement, limit systems, policy and key controls. We will discuss different practical hedging techniques.

After the seminar, participants will understand the important types of risk in market activities and which types of limits and procedures are necessary to effectively manage these risks.

Conference Centre of the Danubius Grand Hotel Margitsziget, Budapest.

Save time and money with in-house training
